Executive Summary

Rodi Digital is a cleanly built Next.js agency site with solid technical fundamentals — singular H1s, clean keyword URLs, a mobile viewport, and an indexable robots policy. Its standout strength is AI-search readiness: a purpose-built llms.txt and a robots.txt that explicitly admits GPTBot, ClaudeBot, PerplexityBot, and Google-Extended put it ahead of most sites on GEO. The most urgent problems are content-metadata duplication and missing structured data: 15 of 17 pages share an identical title and meta description, no page carries a canonical tag, the sitemap.xml returns a 500 error, and the only schema present is a single Organization block repeated everywhere. The single highest-leverage fix is per-page unique titles/descriptions plus canonical tags; the biggest AEO win is adding FAQPage schema to the homepage FAQ.

Dimension	Score	Status	Key Takeaway
SEO	5/10	On Track	Duplicate titles/descriptions, no canonicals, broken sitemap, no rich schema.
GEO	6/10	On Track	Excellent AI-crawler access + llms.txt; weak E-E-A-T (no team/authors, one social link).
AEO	5/10	On Track	Good FAQ content patterns but zero answer schema (FAQPage/HowTo/Speakable).
Combined	16/30		

Pages Audited

URL	Page Type	Notes
/	Homepage	Org schema; FAQ content (no FAQPage schema); no og:image
/approach	Approach index	Duplicate title/description; no canonical
/approach/analytics	Approach sub-page	~1130 words; duplicate metadata
/approach/collaboration	Approach sub-page	~1134 words; duplicate metadata
/cases	Case studies index	7 cases listed; duplicate metadata
/cases/wally	Case study	~430 words; duplicate metadata; no CaseStudy schema
/cases/iprhq	Case study	~436 words; duplicate metadata
/cases/peach	Case study	~430 words; duplicate metadata
/cases/rodi	Case study	~419 words; thin content; duplicate metadata
/cases/rodi-sites	Case study	Unique title present; no canonical
/cases/traï	Case study	~261 words — thinnest page; duplicate metadata

URL	Page Type	Notes
/cases/diffgraph	Case study	~426 words; duplicate metadata
/contact	Contact	Unique title + description; NAP present; no LocalBusiness schema
/services	Services index	Duplicate metadata; no Service schema
/services/ai-enabled-applications	Service detail	~977 words; duplicate metadata; no Service schema
/services/mobile	Service detail	~938 words; duplicate metadata; no Service schema
/services/web	Service detail	~1076 words; duplicate metadata; no Service schema

SEO Analysis

Score: 5/10 — On Track

Technical On-Page

Signal	Finding	Status
Title tag	Present on all pages but DUPLICATED: 15/17 pages use the identical "Rodi Digital AI, Mobile & Web Development Agency". Only /contact and /cases/rodi-sites are unique. Length OK (~52 chars).	Needs Attention
Meta description	Present everywhere but DUPLICATED: 15/17 pages share the homepage description. /contact is the only other unique one. Optimal length (~155 chars).	Needs Attention
Heading hierarchy	Every page has exactly one H1; H2s are logical and topic-relevant (Our Services, Data-Driven Development, FAQ, etc.).	Good
URL structure	Clean, readable, keyword-relevant (/services/ai-enabled-applications, /cases/wally). No parameters or stop words.	Good
Canonical tag	MISSING on every page (0 canonical tags site-wide). Risk of duplicate-content indexing.	Missing
Robots meta	index,follow present; googlebot meta allows large image previews. No accidental noindex.	Good
Viewport / mobile	viewport meta present on all pages; responsive layout.	Good
Image alt text	Next/Image used; alt attributes present on logos and case images. Verify decorative 3D hero canvas has aria-hidden.	Needs Attention
Internal links	Present and descriptive; nav + footer expose all key sections.	Good
Open Graph / Twitter	og:title, og:description, og:url, og:site_name present. NO og:image anywhere; Twitter card is "summary" (no image).	Needs Attention
Sitemap.xml	Returns HTTP 500 Internal Server Error — sitemap is broken/unavailable to crawlers.	Missing

Content Quality

Signal	Finding	Status
Word count	Service detail pages are strong (938-1076 words); case studies are thin (261-503 words, trail lowest). Homepage ~818 words.	Needs Attention
Keyword signals	Primary topics (AI, mobile, web development) established; semantic terms (chatbots, React Native, cross-platform) present on service pages.	Good
Content freshness	No visible publication or last-updated dates on any page.	Needs Attention
Readability	Scannable: short paragraphs, bullet lists, clear subheadings throughout.	Good

Structured Data

Signal	Finding	Status
Schema markup	Only Organization schema present, repeated identically on every page. No Service, FAQPage, BreadcrumbList, Article/CaseStudy, or LocalBusiness.	Needs Attention
Schema validity	Organization block is syntactically valid (name, url, logo, address, contactPoint, sameAs, areaServed, serviceType).	Good

GEO Analysis

Score: 6/10 — On Track

E-E-A-T Assessment

Signal	Finding	Status
Author information	No named authors or founders visible anywhere; no About/Team page exists (/about, /team return redirects).	Missing
About page	No dedicated About/Team page. Company context lives only in the homepage blurb and llms.txt.	Missing
Contact information	Email (hello@rodi-digital.com) and postal address present; no telephone number listed.	Needs Attention
Trust signals	7 case studies provide social proof; no testimonials, awards, certifications, or press mentions.	Needs Attention
Organization schema	Present and declares brand entity (name, logo, url, address, sameAs, areaServed, serviceType).	Good

Content for AI Synthesis

Signal	Finding	Status
Factual density	Service pages cite specific technologies (React Native, Expo, LLMs); case studies lack quantified results/metrics.	Needs Attention
Clear claims	Value proposition stated plainly at top of homepage ("Apps, AI, and Websites — Built with You").	Good

Signal	Finding	Status
Source citation	No external authoritative sources or data cited in content.	Missing
Comprehiveness	Service pages are thorough; case studies leave key questions unanswered (no outcomes/impact data).	Needs Attention
Entity clarity	Brand named consistently; service areas (NL, EU, US) declared in schema.	Good
Originality signals	Clear POV ("data-driven, build with you"); no original datasets or unique research to cite.	Needs Attention

Technical GEO

Signal	Finding	Status
Structured data depth	Only Organization; no Author, Dataset, ClaimReview, or SpeakableSpecification.	Needs Attention
HTTPS / security	Site served fully over HTTPS.	Good
Clean crawlability	robots.txt allows AI crawlers explicitly; no JS-only rendering blocks for key content (SSR Next.js).	Good
SameAs / brand entity	Only LinkedIn in sameAs; no Twitter/X, GitHub, Instagram, or Crunchbase links.	Needs Attention

AEO Analysis

Score: 5/10 — On Track

Featured Snippet Eligibility

Signal	Finding	Status
Direct answer paragraphs	Homepage FAQ answers are concise (~40-60 words) directly under question headings — strong snippet pattern.	Good
Definition patterns	Service pages define topics clearly ("AI-Powered Applications..."); no crisp "X is..." definitions on case pages.	Needs Attention
List content	Bulleted service feature lists present and snippet-friendly.	Good
Table content	No comparison tables anywhere on the site.	Missing

Structured Answer Formats

Signal	Finding	Status
FAQ schema	Homepage has visible FAQ content with 6 Q&As but NO FAQPage schema markup — major missed opportunity.	Missing
HowTo schema	No step-by-step process content marked up with HowTo (approach pages describe method but not as steps).	Missing
Question-phrased headings	FAQ uses natural question language ("What services does Rodi Digital offer?"); other pages use declarative headings.	Good

Signal	Finding	Status
Speakable schema	No SpeakableSpecification markup for voice-friendly sections.	Missing

Voice Search Readiness

Signal	Finding	Status
Conversational language	FAQ copy is natural and conversational.	Good
Long-tail question coverage	6 FAQ questions cover who/what/where/how; limited why/when coverage.	Needs Attention
Local signals	NAP (address, email) present; no telephone; no LocalBusiness schema; no location landing pages.	Needs Attention

Priority Recommendations

Priority	Issue	Dimension	Effort	Impact
Critical	Write unique, keyword-targeted <title> + meta description for every page (15/17 currently identical)	SEO	Low	High
Critical	Add rel=canonical tags to all pages and fix sitemap.xml (currently 500 error)	SEO	Low	High
High	Add FAQPage schema to the homepage FAQ (6 Q&As already present, just unmarked)	AEO	Low	High
High	Add Service schema to /services/* pages and BreadcrumbList site-wide	SEO/GEO	Medium	High
High	Add og:image + twitter:image (summary_large_image) to every page	SEO	Low	Medium
High	Create an About/Team page naming founders/leads to strengthen E-E-A-T	GEO	Medium	High
Medium	Expand thin case studies (tra1 261, rodi 419 words) with outcomes, metrics, and results	SEO/AEO	Medium	Medium
Medium	Add quantified results/metrics to case studies for AI-citation factual density	GEO	Medium	Medium
Medium	Expand sameAs to Twitter/X, GitHub, Instagram; add telephone to contact/schema	GEO	Low	Medium
Medium	Add LocalBusiness schema with NAP + telephone on /contact	AEO	Low	Medium
Quick Win	Add visible last-updated dates to content for freshness signals	SEO	Low	Low
Quick Win	Add aria-hidden to the decorative 3D hero canvas for accessibility	SEO	Low	Low

What's Working Well

Strength	Evidence
AI-crawler-friendly robots.txt	Explicitly allows GPTBot, ClaudeBot, Claude-Web, Google-Extended, ChatGPT-User, PerplexityBot, anthropic-ai; blocks MJ12bot. Rare and forward-thinking.
Purpose-built llms.txt	A well-structured 3.1KB llms.txt describes the agency, technologies, services, approach, and links key pages — directly serves GEO/AI search.
Clean technical base	Singular H1 on every page, clean keyword URLs, mobile viewport, indexable robots policy, HTTPS everywhere.
Valid Organization schema	Declares brand entity with NAP, logo, LinkedIn sameAs, areaServed, and serviceType — a solid E-E-A-T foundation.
Strong FAQ content pattern	Homepage FAQ uses question-phrased headings with concise 40-60 word answers — ideal snippet/answer-engine fodder.
Substantive service pages	AI, Mobile, and Web service pages run 938-1076 words with clear feature lists and semantic keyword coverage.

Glossary

SEO — Search Engine Optimization — optimizing pages so traditional search engines (Google, Bing) can find, understand, and rank them. Covers titles, meta descriptions, headings, URLs, canonicals, sitemaps, and structured data.

GEO — Generative Engine Optimization — optimizing for AI-powered search engines (Perplexity, ChatGPT Search, Google AI Overviews, Gemini) that synthesize answers from multiple sources and cite pages. Rewards clarity, authority, factual density, and crawlability for AI bots.

AEO — Answer Engine Optimization — optimizing for featured snippets, People Also Ask boxes, and voice assistants that extract a direct, concise answer. Rewards question-phrased headings, short answer paragraphs, and FAQ/HowTo/Speakable schema.

E-E-A-T — Experience, Expertise, Authoritativeness, Trustworthiness — Google quality signals rooted in named authors, credentials, contact info, and trust signals.

Schema / Structured Data — JSON-LD or microdata that labels page content for machines (e.g., Organization, Service, FAQPage) so search/AI engines can parse it reliably.
